👤 Summary

Full Stack Developer with strong experience in both frontend and backend development. I work with modern frameworks such as **React.js/Next.js, Spring Boot, Laravel**, and others. My background allows me to apply best practices in building high-quality web applications and scalable systems. I am comfortable working across the full stack, from UI to databases and backend logic, and I continuously strive to write clean, maintainable, and efficient code.

👜 Professional Experience

Freelance Developer

2022 – present

Self-Employed

- Delivered multiple projects across diverse tech stacks including **Laravel, Spring Boot, React, Next.js, React Native**,
- Built responsive web applications, mobile apps, and backend APIs tailored to client needs.

Application developer

04/2024 – 08/2024

ATOS

Casablanca, Morocco

- **Developed a desktop application for calculating overtime** tailored to ATOS using **Electron.js, TypeScript, React, Shadcn UI, Node.js**, and **SQLite**. The app features real-time updates via WebSockets, exports reports to Excel, and provides a user-friendly interface for accurate overtime tracking.
- **Built a web application for administrative management** using **Next.js, React, Shadcn UI, TypeScript, Node.js**, and **SQLite**. Implemented secure user authentication, role-based access control, and efficient data management with a responsive and modern UI.
- **Developed a blog management system** based on the **MERN stack** (MongoDB Atlas, Express.js, React, Node.js), integrated with **Git/GitHub** for version control and **Google Analytics** for traffic monitoring. Features include content creation, editing, publishing workflows, media uploads, and SEO optimization.

Web developer

03/2023 – 05/2023

CDC Digital and AI

Casablanca, Morocco

Developed a web application using **Laravel (backend)** and **React (frontend)** with **RESTful APIs** to enable company employees to print various management documents. The application includes user authentication, role-based access control, and a responsive interface. Version control was managed with **Git** and **GitHub** to ensure collaborative development and code quality.

Projects

Feature-Rich Calendar Application

Built with **Next.js**, **React**, **TypeScript**, and **ShadCN UI**, this open-source calendar offers a customizable and interactive user experience. Features include multiple calendar views, event management, and a modern, accessible UI. Utilizes **date-fns** for date manipulation.

School management system

A full-featured school management system

Developed a fully decoupled school management system from A to Z using **Laravel** (backend) and **React** (frontend). The app delivers a smooth user experience and comprehensive features including student, teacher, course, and timetable management. Real-time updates are powered by **WebSockets**, data is stored in **MySQL**, and the project is managed with **Git/GitHub** for version control and collaboration.

Thought Trail — Modern Minimalistic Blog Application

Designed and developed a sleek, performance-focused blog platform built on the **MERN stack** (MongoDB Atlas, Express.js, React, Node.js) with **TypeScript**. Thought Trail emphasizes simplicity and a user-friendly interface, enabling seamless content creation and sharing for bloggers and writers. The application supports efficient publishing workflows and responsive design for an optimal reading experience across devices.

Administrative Document Management at Atos

As part of my project at Atos

Developed an administrative document management system using **Next.js**, **Prisma**, and **SQLite** to streamline the creation, management, and secure storage of administrative documents. The application features a user-friendly interface built with Next.js and Prisma for efficient data handling. Key functionalities include document creation, editing, deletion, and advanced search capabilities based on multiple criteria. Implemented robust user authentication and authorization mechanisms to ensure that only authorized personnel can access and modify documents, maintaining high standards of data security and integrity.

Calculation of overtime hours

As part of my project at Atos

Developed a cross-platform desktop application using **Node.js**, **ElectronJS**, and **React**, combining backend logic with a rich user interface. The app enables efficient tracking and management of overtime hours, delivering a seamless and intuitive experience across multiple operating systems. Leveraged ElectronJS for desktop capabilities, React for UI components, and Node.js for backend processing, ensuring responsiveness and reliability.

Modern Developer Portfolio

A sleek, responsive portfolio website built with **Next.js** and **ShadCN UI** to showcase skills, projects, and professional experience with clean design and smooth navigation.

Block editor (wizywig) App

Developed a dynamic and extensible WYSIWYG editor using **Next.js** and **Tiptap**. This project leverages Tiptap's rich extension capabilities and Next.js's optimized performance to deliver a smooth, responsive, and customizable text editing experience suitable for various content creation needs.

Education

Master's degree in Distributed Systems and Artificial Intelligence

ENSET Mohammedia

Currently pursuing a master's degree focused on advanced topics in distributed systems and AI technologies.

09/2024 – present
Mohammedia, Morocco

Professional Bachelor in Software Engineering and Advanced Administration of Computer Systems and Networks

EST Casablanca

Studied software engineering principles, advanced computer systems, and network administration.

10/2023 – 07/2024
Casablanca, Morocco

Specialized Technician in Web Programming And Technologies

IFSO Casablanca (OFPPT)

Acquired skills in web programming, including front-end , back-end and cloud technologies.

09/2021 – 06/2023
Casablanca, Morocco

Skills

HTML/CSS/JS/TS

React.js/Next.js

Vue.js

Angular

Node.js/Nest.js

PHP/Laravel

Java/JEE/Spring

SQL/NoSQL
